

Porch & Dock Curtain Information (2022)

Custom fabricated porch curtains are an excellent way to protect your porch screens/windows all year. These can be removeable curtains attached with turn buttons, so they are put up in the fall and removed for the summer, or they can be roll up curtains left up all year and rolled up and down as needed. These curtains make an excellent dock lift curtain also to protect the gel coat of your boat from the sun (always check your lake's DNR regulations prior to the investment).

Sunbrella: 99% of our customers use this fabric. Sunbrella is a high-quality acrylic awning fabric that is fabricated for outdoor use. This fabric works well in hot or cold temps, lasts a long time (15 to 20 years up here typically) and provides the most protection from light. It's a breathable fabric so very low heat retention / good wind block.

Sunbrella® Awning Fabric

Sunbrella awning fabric makes it easy to create beautiful shade structures that outperform the elements. This awning fabric offers excellent fade, weather, and water resistance. Choose from a wide selection of colors and patterns to fit any space. It is perfect for coordinating with [Sunbrella upholstery fabrics](#). Sunbrella awning fabric comes in multiple widths, including an **80-inch option**.

Among our options is the exclusive Sunbrella Mayfield Collection®, designed for upscale outdoor living. It combines a premium aesthetic with the legendary performance that Sunbrella offers. Find classic outdoor fabric designs, featuring refined colors and wider repeats. These fabrics add style and elegance to any awning or canopy.

Make sure to check out our entire collection of [awning canvas](#) and [specials on Sunbrella](#). Or head over to our [Sunbrella fabrics](#) page to learn how Sunbrella changed the awning standard over 50 years ago. Certain Sunbrella fabrics are **Made in the USA** with imported fibers. If you would like additional information, please contact your sales representative.

High Quality Mesh Fabrics: Some customers still want protection from the elements while letting some light into the area. A high-quality awning mesh fabric allows light to filter through at different levels depending on the fabric while also providing protection from the elements.

AwnTex® Outdoor Fabric

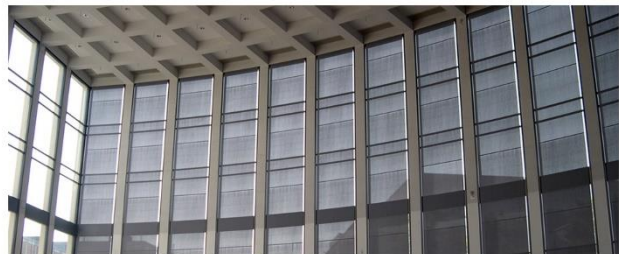

Made from vinyl-encapsulated polyester, AwnTex sun screen fabric is ideal for patio awnings, umbrella applications, window covers, and other **shade structures**. AwnTex provides excellent shading advantages without trapping heat or airflow. The unique material offers the translucent trait of mesh with the attractive design of shade cloth. The high-quality outdoor fabric is UV ray, mildew, and water resistant.

Granting an additional level of protection, AwnTex is infused with Microban® antimicrobial technology. Microban inhibits the growth of stains and odor-causing bacteria, keeping your awning fabrics cleaner for longer. Because the solution is baked in, it won't wash or wear away for the lifetime of the fabric.

In a range of unique colors, AwnTex awning fabric adds style to any porch or outdoor space. Browse rolls of screen fabric below for optimal solar protection.

Serge Ferrari Soltis® Vinyl Mesh Fabric

Serge Ferrari Soltis is a high-performing vinyl mesh fabric. It is best used as a solar screen fabric for exterior windows, retractable awnings, commercial building facades, greenhouses, rooftops, and more. The heavy-duty mesh fabric helps regulate the thermal effect of the sun. It preserves privacy and comfort without obstructing the view.

The Soltis line also offers designer fabrics with a blackout layer to prevent any transmission of visible light and UV rays. The thin, flat properties of the fabric suit small-sized windows. Ideal for interior or exterior blackout blinds, Soltis does not require any kind of reinforcement.

Porch & Dock Curtain Information (2022)

Clear Vinyls: Curtains made with clear vinyl are bordered with Sunbrella. The pros to Clear Vinyl curtains are that they provide excellent heat retention while allowing you to see outside; the biggest con is that these curtains CAN NOT be rolled up or down in the cold weather. They have a very low cold crack but with regular cold weather use they will crack. They are made to resist yellowing, clouding, scratching and UV damage. People that get clear vinyl curtains typically drop them in the fall and roll them up in the spring.

The best way to get a quote for new curtains is to send a photo of where you need them installed with some general measurements of each opening you would like covered.

Porch curtains can vary a great deal in price, as they are simply a time and materials custom job. You can generally expect \$725 to \$825 each curtain for standard sized, one welded seam covering with measuring, design, fabrication and install; \$775 to \$875 for a roll up and/or clear vinyl; and \$850 to \$950 for the higher priced mesh fabrics.

Our business model is simple: we make a high-quality, custom-made product that we are confident we can stand behind. We use only the highest quality materials in the fabrication of our curtains and bring 30+ years of knowledge and experience to the table. Check out examples of our work at www.EagleRiverBoatCover.com or on our Facebook site.
