Woven Vinyl Flooring Care and Cleaning

One of the best ways to keep your new Woven Vinyl Flooring looking good is to hose it off on a weekly basis with clean water. This helps prevent dirt from becoming deeply embedded in the flooring and eliminates the need for more vigorous cleaning. Your new Woven Vinyl flooring does not promote mildew growth; however, mildew may grow on dirt and other foreign substances that are not removed from the flooring. In most environments, a thorough cleaning will be required as soiling dictates. When it's time for light or thorough cleaning, please use the following instructions.

General or Light Cleaning

- Brush off loose dirt and hose down flooring.
- Prepare a solution of water and mild soap such as dishwashing liquid or a gentle household cleaner.
- Apply a small amount of water and soap mixture.
- Use a **soft bristle** brush to clean.
- Rinse thoroughly until all soap residue is removed.
- Allow to air dry.
- May require retreatment depending on the soiling level of the fabric.

Heavy Cleaning for Stubborn Stains and Mildew

If stubborn stains persist, use a diluted bleach/soap mixture for spot cleaning of mildew. For roof run-off or other similar stains, a strong degreaser may be required.

To clean stubborn stains:

- Prepare a solution of 1 cup bleach and 1/4 cup mild soap per gallon of clean water.
- Apply small amount of bleach & soap mixture.
- Blot stain with a sponge or clean towel.
- Rinse thoroughly to remove all cleaner residue.
- Allow to air dry.
